

Sarfaraz Singh

Web Developer

I have expertise in web development technologies such as HTML/CSS, JavaScript, jQuery, PHP, AJAX, FileZilla, and Codeigniter fundamentals. I also have experience in Laravel fundamentals, version control systems like Git/GitHub, and using Chat GPT (if it is counted as a skill :). With good mentorship and a supportive environment, I can be an asset to any team, bringing my technical skills and a positive attitude to the table.
